PHIL 213 Societal and Ethical Implications of Technology

What is technology? What is society? What are ethics? What effect does technology have upon a particular society at a

particular time in history? These are the questions which will help us formulate, understand, and answer the main question in this course: How does a society, or a group within a society, make rationally sound, moral choices about the best use of existing and new technologies. We will review the history of technology and society, beginning with humans mastering the use of fire, and ending with humans manipulating atoms and molecules at the nanoscale. The major focus of our work will be, however, the social and moral implications of technology from the 16th century to the present time and beyond.
